

# Hospital Value: How do MidAtlantic Hospitals Measure Up?

Dear MidAtlantic Health Care Purchaser:

Did you know that hospital quality in our region significantly varies? **For example, did you know that almost 40% of the hospitals in our region only score a “C” or “D” on the Leapfrog hospital safety Four-Letter rating? And, that there is not a single hospital with an “A” rating in the District of Columbia? Is that the best we can do?**

The good news is that many of our highest-quality regional hospitals are the most cost effective! Do you know which ones those are?

Many coalitions across the country are improving hospital quality and cost. You are invited to an exclusive purchasers-only meeting to start the conversation about how to understand and improve the value you’re receiving from the hospitals your members are visiting in our region. Our goal is to collectively improve hospital safety, ensure accessibility to safe hospitals close to home, educate employees on making informed healthcare choices, and empower purchasers and health plans to reward high performance!

Leading this dynamic conversation are leaders from:

The Leapfrog Group

<https://www.leapfroggroup.org/>

Sage Transparency Project

<https://employerptp.org/sage-transparency/>

Maryland Health Care Commission

<https://www.wearthecost.org/>

“Wear the Cost”

Patients for Patient Safety

<https://www.pfps.us>

You’ll be part of an exclusive group limited to 12-15 influential purchasers. Please join us and help us formulate the strategy that best serves your organization, your members, and the community. Together, we can start the process of improving the quality AND controlling the cost of healthcare in the MidAtlantic.

January 26, 2023 11 AM - 1 PM (Catered Lunch Served)

ASHA Headquarters

2200 Research Blvd.
